

What is DevOps?

DevOps is a software development approach that combines the Development and Operations teams. It focuses on improving collaboration, automating processes, and delivering software faster with better quality.

Advantages of DevOps

- Faster software delivery
- Better collaboration between teams
- Improved software quality
- Reduced manual work through automation
- Faster bug detection and fixing
- Continuous monitoring and deployment

What is Agile Methodology?

Agile is a software development methodology where work is completed in small parts called sprints. It allows teams to quickly adapt to changes and deliver software regularly.

What is Scrum?

Scrum is an Agile framework that helps teams manage work using roles, meetings, and sprints to deliver projects efficiently.

Important Meetings in Agile

- **Sprint Planning:** Plans the work for the upcoming sprint.
- **Daily Scrum:** A 15-minute daily meeting to discuss progress and blockers.
- **Sprint Review:** Demonstrates completed work and collects feedback.
- **Sprint Retrospective:** Discusses improvements for the next sprint.

The 5 Scrum Ceremonies

Advantages of Agile

- Faster delivery of software
- Easy to handle changing requirements
- Better teamwork and communication
- Regular customer feedback
- Improved software quality
- Continuous improvement after every sprint
